PROFESSIONAL PROFILE

DevOps Engineer with hands-on production experience at 360XpertSolutions (February 2026 – July 2026) and currently channeling that expertise as DevOps Developer Faculty at Techzone Learning (July 2026 – Present) — building systems by day, shaping the next generation of engineers by design. Production-grade experience across AWS, Kubernetes, CI/CD, GitOps, IaC with Terraform and Ansible, security scanning, and full-stack observability. Experienced in designing and delivering structured DevOps training, mentoring students, and career guidance. Pursuing BSE at Bahria University, Karachi (7th Semester, Expected Jun 2027).

PROFESSIONAL EXPERIENCE

DevOps Developer Faculty

July 2026 – Present

Techzone Learning · Karachi, Pakistan

- Serving as DevOps Developer Faculty, delivering structured DevOps training as part of the institute's Computer Technology & Languages program.
- Designing and delivering weekly sessions covering CI/CD pipelines, containerization, version control, core AWS, Linux, and Bash scripting.
- Mentoring students on practical, industry-relevant DevOps practices and providing career guidance.
- Supporting learners in bridging the gap between theoretical concepts and real-world implementation.

DevOps Engineer

February 2026 – July 2026

360XpertSolutions · Karachi, Pakistan

Cloud Infrastructure (AWS)

- Architected VPC environments: public/private subnets, route tables, internet/NAT gateways, VPC peering, endpoints, PrivateLink.
- Managed IAM, security groups, NACLs, GuardDuty, WAF, Firewall Manager, SCP, Landing Zone, and Access Manager.
- Provisioned EC2 with Auto Scaling, EBS, ECS, EKS, Lambda, RDS, S3, CloudFront, Route 53, Global Accelerator.
- Wrote IaC using Terraform; used LocalStack and MiniStack for local AWS service emulation and testing.

CI/CD, GitOps & Security

- Built multi-stage Jenkins pipelines and GitHub Actions workflows, reducing deployment time by ~40%, with SonarQube and Trivy/Snyk security scanning.
- Implemented GitOps workflows using ArgoCD and Flux for declarative Kubernetes deployments; packaged applications as Helm charts.
- Explored Floci for workflow automation and pipeline orchestration.

Containers, Orchestration & Automation

- Containerized applications with Docker and Podman; managed Kubernetes clusters (Deployments, Services, Ingress, ConfigMaps, HPA); explored Nomad.
- Automated server provisioning using Ansible playbooks, reducing manual configuration time by ~50%.
- Configured Nginx, Caddy, Apache as reverse proxies; managed Tailscale VPN, Samba file servers, and Bash automation scripts.

Monitoring & Databases

- Deployed Prometheus, Grafana, Datadog, New Relic, and ELK Stack for full-stack observability and alerting.
- Worked with PostgreSQL, MongoDB, Redis; wrote SQL queries and practiced NoSQL document modeling.

PROJECTS

Distributed Task Manager — Full DevOps Implementation

2026

Personal Project

- Production-grade microservices: 3 services behind Nginx LB with round-robin, RabbitMQ queues, Redis caching, MongoDB — 11 Docker containers total.
- GitHub Actions CI/CD with Trivy scanning in under 90 seconds; Prometheus + Grafana monitoring all instances in real time.

Tech Stack: Docker · Node.js · MongoDB · Redis · RabbitMQ · Nginx · Prometheus · Grafana · GitHub Actions · Trivy

Full-Stack E-Commerce Platform — AWS Infrastructure & Terraform

2026

Team Project · Role: AWS Infrastructure + Terraform

- Built entire AWS infrastructure as code using Terraform: VPC, EKS, RDS PostgreSQL, S3, ECR, IAM, EC2 with branch protection strategy.
- Deployed Node.js backend on EC2 with PM2 via SSL; React frontend on EC2 — full stack live on AWS.

Tech Stack: Terraform · AWS (EKS, RDS, S3, ECR, VPC, EC2, IAM) · Docker · Kubernetes · GitHub Actions · Node.js · React · PostgreSQL

Orbit — Serverless Uptime Monitor

2026

Personal Project

- Serverless website uptime monitor with automated health checks, 3-strike email alerting, and a live dashboard showing uptime %, response-time trends, and auto-generated improvement suggestions.
- Built with Node.js and PostgreSQL with a no-login flow for simplicity.

Tech Stack: Node.js · PostgreSQL · Serverless · Email Alerting

CI/CD Pipeline Health Dashboard

Personal Project

- Real-time Grafana dashboard integrated with Jenkins and GitHub Actions surfacing DORA metrics across multiple projects.

Tech Stack: Prometheus · Grafana · Jenkins · GitHub Actions

TECHNICAL SKILLS

Cloud & IaC	AWS (VPC, EC2, EKS, ECS, IAM, S3, RDS, Lambda, WAF, CloudFront, GuardDuty, Route 53, Auto Scaling), Terraform, LocalStack, MiniStack
Containers	Docker, Podman, Kubernetes, Helm, ArgoCD, Flux, GitOps, Nomad
CI/CD & Security	Jenkins, GitHub Actions, Git, SonarQube, Trivy, Snyk, Floci
Monitoring	Prometheus, Grafana, Datadog, New Relic, ELK Stack (Elasticsearch, Logstash, Kibana)
Automation	Ansible, Bash Scripting, Linux, Disk Management
Web & Networking	Nginx, Caddy, Apache, Tailscale VPN, Samba
Databases	PostgreSQL, MongoDB, Redis, SQL, NoSQL
Deployment	Vercel, AWS EC2/EKS, Docker Compose, Serverless
Teaching	DevOps Training, Curriculum Design, Student Mentoring, Career Guidance

EDUCATION

BSE – Bachelor of Software Engineering

Expected Jun 2027

Bahria University, Karachi · 7th Semester

ADDITIONAL

360XpertSolutions Certificate of Completion (Silver) — DevOps Internship, Jul 2026 · SQA Manual Testing Course · Founder, Bahria Blaze Events · Languages: English (Professional), Urdu (Native)
